IN THE CLAIMS:

1. - 10. (Canceled)

11. (Original) A printing method,

wherein a computer displays a print acceptance screen on the basis of page data sent from a given node,

the print acceptance screen comprising:

a first area for a user to specify a peripheral device to acquire print data;

a second area for a user to specify a given condition when the peripheral device acquires the print data; and

a third area for a user to specify a printer made to print on the basis of the print data, and

wherein the computer acquires the print data from the peripheral device specified in the first area in accordance with the given condition specified in the second area and sends an acquisition/print request for printing to the printer specified in the third area.

12. (Original) A printing method,

wherein a computer displays a print acceptance screen on the basis of page data sent from a given node,

the print acceptance screen comprising:

a first area for a user to specify a peripheral device to acquire print data;

a second area for a user to specify a given condition when the peripheral device acquires the print data; and

a third area for a user to specify a printer made to print on the basis of the print data, and

wherein the computer sends an acquisition/print request to the peripheral device specified in the first area to cause the peripheral device to acquire the print data in accordance with the given condition specified in the second area and to send the acquired print data to the printer specified in the third area, thereby causing the printer to print.
